📍 India

Summary

Motivated and detail-oriented aspiring SOC Analyst currently pursuing a B.Sc. in Computer Science. Completed the Google Cybersecurity Certificate and built hands-on tools for log analysis and threat detection. Eager to contribute to SOC operations by monitoring alerts, analyzing incidents, and supporting continuous security improvements.

Core Skills

- **Security Monitoring & Analysis:** SIEM (Splunk, Wazuh), Wireshark, Log Analysis, Incident Response
- **Technical Fundamentals:** Networking (TCP/IP, DNS, Firewalls), Operating Systems (Windows, Linux)
- **Security Concepts:** Threat Detection, Malware Analysis, Vulnerability Assessment, Risk Management
- **Programming/Scripting:** Python, Bash
- **Soft Skills:** Analytical Thinking, Team Collaboration, Communication, Attention to Detail

Certifications & Training

- Google Cybersecurity Certificate – Coursera – April 2025   🔗 [View Certificate](#)
- Ethical Hacking – Internshala – November 2024   🔗 [View Certificate](#)
- Cyber Security Internship – Phoenix Softech – June 2025   🔗 [View Certificate](#)

Education

GTN Arts College   B.Sc. in Computer Science (2023 – 2026)   Dindigul, Tamil Nadu

Projects & Hands-on Experience   🔗 [View All Projects](#)

1. Log Parser

Developed a Python tool to auto-detect and parse Apache, Syslog, and Auth.log files into structured formats (CSV/Excel). Improved log analysis efficiency and supported threat detection.

2. Simple Network Scanner

Built a lightweight Python network scanner using sockets and Nmap to identify active hosts and open ports within a local network.

Professional Experience

Cybersecurity Project Developer – Freelance | Jan 2024 – Present

- Simulated SOC scenarios using Wazuh and log files
- Documented incidents and detection workflows
- Collaborated in creating detection logic and incident playbooks
